

WHITE PAPER

On Deployment
of Stratification
Methods 

THE WHITE PAPER

The goal of the White Paper is to spread knowledge about the use of risk stratification tools at policy making, healthcare management and clinical practice levels.

It describes in detail the main barriers and facilitators which can be encountered when planning and deploying risk stratification tools in a regional intervention.

If you want to know more about the

ASSEHS workshop in the 16th International Conference on Integrated Care

On the 24th of May 2016 during the 16th International Conference on Integrated Care in Barcelona the ASSEHS workshop was organized.

Entitled "Risk stratification tools for integrated care: appraisal, deployment and impact in Europe", it aimed to showcase the good practices in a participative workshop and to share the state of the art of risk stratification tools and implementation practices. To read more click [here](#).

The final ASSEHS meeting

The final ASSEHS meeting was held in Montpellier (France), 30-31 May 2016, where we analyzed the progress of the project and the final milestones and deliverables that partners had to carry out before ending the project. To read more, click [here](#).

End of the project - Concluding remarks!

During the three years of the project, ASSEHS has generated knowledge on the use of stratification tools at policy making, healthcare management and clinical intervention and practice levels. A big thank you to everyone who has contributed to the project!
